

Review and Remember 1

Jobs

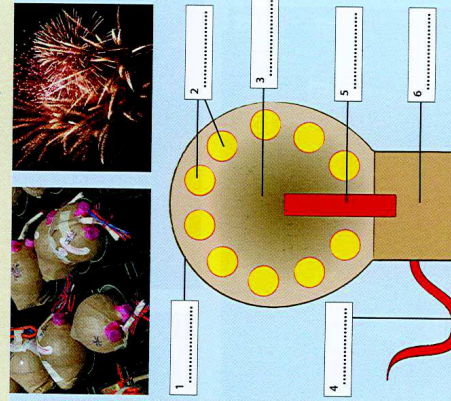

- Complete these sentences about your job.
 - I work for
(for + company name, e.g. Allied Technologies)
 - I work at
(at + location, e.g. at our Lodz factory / site)
 - I work in
(in + a department or place, e.g. logistics / the paint shop)
 - I work with
(with + regular contacts, e.g. the design and purchasing departments)
 - I'm responsible for
(in charge of or responsible for + responsibilities, e.g. production planning)
 - My job involves
(involves + activity, e.g. checking / testing / calculating / a lot of travel, etc.)
- Work in pairs. Interview one another about your jobs or a job you'd like to have. Say if you need to do these things. Explain why or why not. Listen to your partner carefully and take brief notes.

A	B
1 work in a team	1 travel to customers
2 be a good listener	2 read a lot of technical documents
3 give advice	3 be creative
4 design things	4 work with strangers
5 make decisions quickly	5 organize things
6 speak English	6 speak foreign languages
- Tell the class about your partner's job.

How does it work?

- Think of some things and substances that catch fire easily or can easily explode.
- An aerial shell is one of the most popular fireworks in public displays. Read a description of how it works. Label the diagram with words from the list.

fuse	time fuse	bursting charge
stars	casing	lifting charge

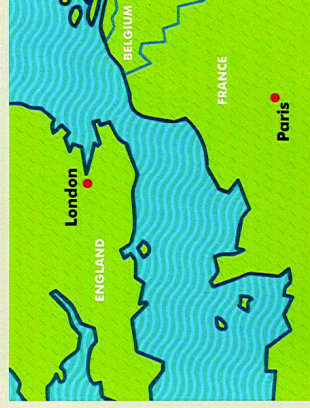

The aerial shell is placed in a small steel pipe, which is called a mortar, for launching. The shell's casing is made of paper which is strengthened with string. It has to be capable of withstanding high pressure because it is launched into the air at high speed.

Size and distance

- Complete the table.

Dimensions		Questions
Noun	Adjective	How long is it? What's the length?
length	long	
1	wide	2
3	high	4
depth		5
weight	heavy	What's the weight? How heavy is it? How much does it weigh?
Use a / an or per to relate two different measures. Per is more formal. My car does 5.5 kilometres a / per litre.		

- The English channel is only wide at its narrowest point.
